

MODULATING COMMERCIAL ZONE CONTROL SYSTEM

Features and Benefits:

- Universal commercial zone control system that allows a single HVAC unit to have up to 20 individual zones
- Each zone is controlled by its own thermostat and can use a damper or diffuser
- Simple to set up and troubleshoot; no programming, computers, or training required
- Can be a direct replacement of or alternate product to the Carrier VVT® and Trane VariTrac™ systems
- Features include occupied/unoccupied scheduling, majority wins/cooling priority control, and minimum call selector
